

Indonesia BPO Industry Mapping & AI-Powered Outreach Automation.

Project Overview

This project focuses on building an AI-assisted outbound automation workflow to support business development initiatives within the Indonesian BPO industry. The intern will conduct market research, identify potential partnership opportunities, and prototype automation workflows integrating Claude Code, HubSpot CRM, MCP (Model Context Protocol), and AI agents.

The project aims to explore how AI can improve lead generation, lead qualification, LinkedIn outreach, CRM synchronization, and partnership analysis through scalable and efficient automation workflows.

Business Background

Indonesia's BPO industry continues to expand across sectors such as banking, telecommunications, e-commerce, fintech, insurance, and customer experience services. As the market grows, identifying potential strategic partners and relevant decision-makers becomes increasingly important.

Currently, the outreach and research process is highly manual. The objective of this project is to evaluate and prototype an AI-assisted workflow capable of automating several parts of the business development lifecycle, including industry mapping, stakeholder identification, LinkedIn outreach, and CRM tracking.

The final goal is to create a scalable workflow that helps accelerate partnership engagement and supports offline meeting generation.

Core Technical Components

1. Smart Data Acquisition

This phase focuses on gathering the raw intelligence needed to fuel the AI.

- Market Research: Conduct "Desk Research" to identify the landscape of the Indonesian BPO industry.

- Web Scraping: Use tools like BeautifulSoup or Firecrawl to extract data from the web.
 - Data Categorization: Organize the gathered information into two main buckets:
 - Company Data: Industry type, company scale, and existing client portfolios.
 - Stakeholder Info: Identifying decision-makers and finding their LinkedIn profiles.
-

2. Centralized Intelligence (Claude + MCP)

In this stage, raw data is processed and turned into an actionable business strategy.

- Data Integration: Connect a Centralized Database and HubSpot CRM to the AI layer using the Model Context Protocol (MCP).
 - AI Analysis (Claude Code): Claude acts as the brain to perform three key tasks:
 - Prioritize Targets: Determining which companies are the most valuable to pursue.
 - Identify Partnerships: Finding strategic alignment between your goals and the BPO's needs.
 - Lead Qualification: Filtering leads to ensure they meet the necessary partnership criteria.
-

3. LinkedIn Automation

The workflow transitions from analysis to active outreach.

- Automation Engine: Frameworks like OpenClaw or Hermes orchestrate the tasks.
 - LinkedIn Outreach Actions: The system executes the following:
 - Sends connection requests to the identified stakeholders.
 - Generates personalized messages based on the research from Step 1.
 - Manages follow-up sequences automatically.
-

4. Tracking & Handover

The final phase manages the relationship pipeline and moves the lead toward a human connection.

- Response Monitoring: The system checks: "Did the lead respond?".
- Pipeline Management: * If Yes: The Deal Stage is automatically updated in HubSpot.
 - If No: The system schedules a follow-up or disqualifies the lead if they are not interested.

- **Human Handover:** Once a positive response is confirmed, the system triggers a Notification for an Offline Meeting, handing the relationship over to a human team member.

Project Objectives

The project objectives is to build a scalable automation system that replaces manual research and outreach with an AI-driven workflow. This system focuses on four key outcomes:

- **Scalable Engagement:** Accelerates partnership initiatives by automating outreach without increasing manual workload.
- **Automated Market Mapping:** Maintains a comprehensive, self-updating database of the Indonesian BPO landscape and key decision-makers.
- **CRM Synchronization:** Centralizes all AI-generated insights and outreach logs directly within HubSpot using MCP.
- **Meeting Generation:** Filters through market data to identify high-value leads and trigger notifications for offline partnership meetings.

Workflow

Nares workflow (flowchart) proposed

INDONESIA BPO AI-ASSISTED OUTREACH AUTOMATION WORKFLOW

The workflow starts with **Smart Data Acquisition**, where company and stakeholder data are gathered through desk research, web scraping, Apollo.io, LinkedIn, and intent signals such as hiring activity or digital transformation initiatives. The collected data is then cleaned, enriched, and centralized into a unified database.

Next, the process moves into the **Centralized AI Intelligence Layer**, where Claude + MCP analyze the data to prioritize targets, identify partnership opportunities, qualify leads, and generate AI-personalized outreach content. This layer acts as the “AI brain” that connects all systems, including CRM synchronization and lead scoring.

In the **Automated Engagement Layer**, the system executes multi-channel outreach through LinkedIn automation and AI-generated email sequences. Follow-ups are managed automatically using timing logic and engagement tracking to maintain consistent communication with leads.

The workflow then enters **CRM Tracking & Response Handling**, where all outreach activities are synchronized into HubSpot CRM. If a lead responds positively, the system updates the deal stage and hands the lead over to the sales or AE team for meetings and partnership discussions. If there is no response, the workflow automatically triggers follow-ups or disqualifies low-fit leads.

Finally, the **Continuous Optimization Loop** continuously evaluates outreach performance, improves AI scoring and personalization logic, and updates CRM data quality. This allows the entire workflow to become smarter, more scalable, and more effective over time.

Some other researches:

- **Who is our target client?** What types of BPO companies are we going after — by size, industry focus, or business characteristics?
- **Who is the decision maker?** Which department are we typically looking for — Operations, IT, Business Development, or someone else?
- **Can we find them on LinkedIn?** If possible, try to identify a few specific target contacts as concrete examples.

Target Client

Indonesia's BPO market hit USD 2.13 billion in 2025 and is growing at 10.2% CAGR — with BFSI contributing 23.31% of revenue as the largest end-user segment, followed by Telecom & IT and Retail & e-commerce. Based on this, Wiz.AI's ICP breaks into three tiers:

Target Client List — Indonesia BPO (Detailed)

Priority Targets

	Company	Size	Vertical served	HQ	Why target
1	PT Infomedia Nusantara	8,232 employees (Telkom Indonesia subsidiary, #1 market share in contact center in Indonesia)	Banking, retail, public services, CRM	Jakarta	Largest local BPO — massive scale, actively pursuing digital transformation
2	PT VADS Indonesia	3,818 employees, \$347.5M revenue — joint venture IBM + Telekom Malaysia	500+ organizations across all verticals	Jakarta	Already enterprise-grade serves huge client base ripe for AI layer
3	Transcosmos Indonesia	45+ years experience, 129 locations across 18 countries, joint venture with Salim Group	Call center, back-office, sales expansion	Jakarta	Global scale but local presence — looking for edge in competitive market
4	MitraComm Ekasarana	Est. 1999, 20+ years experience, subsidiary of Phintraco Group	Banking, insurance, telecom, e-commerce	Jakarta (Kuningan)	Serves banking, insurance, telecom, e-commerce exact Wiz.AI sweet spot
5	Asia Outsourcing Services (AOS)	Mid-size	Banking, finance, insurance, telecom	Jakarta	Focused on BFSI — high value vertical for Wiz.AI
6	Teleperformance Indonesia	Large (global: 500k+ employees)	All verticals — fintech, banking, retail	Jakarta, Bali	17% of TP's global client base is financial services insurance — local ops need AI
7	Concentrix Indonesia	Large (global: 455k employees)	BFSI, digital CX, fintech	Jakarta	\$1.54B from BFSI globally — Indonesia ops actively modernizing

Warm Targets

	Company	Vertical	Why target
8	PT Outsource Indonesia	Labor, HR, data entry, call center	Mid-size, growing rapidly no AI layer yet
9	PT Personel Alih Daya Tbk	HR & labor outsourcing	Listed company (Tbk) = has budget, governance
10	Barantum	CRM & call center solutions for SMBs	CRM and IP-PBX solutions since 2017 AI-ready tech stack
11	VALDO Inc.	Banking, finance, telecom, e-commerce, manufacturing	Six sigma management services across multiple verticals, enough to adopt AI
12	ATI Business Group	Travel & aviation, 20+ countries	20+ countries, ADM guarantee, SLA-committed — high CX score needs AI
13	PT Telin (Telkom International)	Telecom, enterprise	Largest state-owned telecom, 200M+ customers — massive scale
14	W Group	Customer experience management	Integrated CX management — actively seeking innovation

Nurture (Long-term pipeline)

	Company	Note
15	PT NEC Indonesia	Telecom & IT solutions — government + private sector
16	Emerhub	SEA market entry + outsourcing — multinational clients
17	PayPrime (PT Payroll Prima)	HR & payroll BPO — scaling fast since 2011
18	DDS	Call center, data entry, SMS masking — smaller but growing
19	PT Centralzen	Outsourcing & offshoring consulting
20	PT Binajasa Abadikarya	Labor outsourcing — large employee base

Apollo.io / LinkedIn search filters :

Code block

```
1 Industry: Outsourcing/Offshoring OR Business Process Outsourcing
2 Location: Greater Jakarta Area OR Surabaya OR Bali
3 Headcount: 500-10,000
4 Job title: "Head of Operations" OR "VP Operations" OR
5           "Head of CX" OR "Chief Digital" OR
6           "Head of Contact Center" OR "Digital Transformation"
7 Intent signal: Actively hiring "call center agent" OR
8               "customer service" (= scaling pain)
```

Decision Makers

The Economic Buyer (Budget holder) --> Must Reach

Title	Why they matter	What they care about
Chief Digital Officer (CDO)	Owns the AI/automation transformation agenda	ROI, competitive edge, scalability
Chief Operating Officer (COO)	Owns efficiency and headcount costs	Cost reduction, SLA performance, scale
CEO (SME-sized BPOs <500 staff)	Makes all decisions directly	Revenue growth, client retention

Feels the pain daily --> Start here for outreach

Title	Why they matter	What they care about
VP / Head of Operations	Manages the contact center agents, feels the manual pain most	Agent productivity, handling time, CSAT scores
Head of Customer Experience (CX)	Owns quality of service delivery to clients	Customer satisfaction, resolution rates, NPS
Head of Contact Center	Runs the actual call center floor	Volume throughput, staffing costs, agent turnover

The Technical Gatekeeper --> Must not be ignored

Title	Why they matter	What they care about
CTO / Head of IT	Technical evaluator — approves integrations	Security, API compatibility, infra requirements
Head of Digital Transformation	Owns the technology roadmap	Strategic fit, implementation timeline
IT Director / VP Technology	Handles vendor due diligence	Data privacy, compliance (OJK for BFSI)

The Outreach Strategy — Who to contact in what order

Code block

- 1 Step 1: Connect with Head of Operations / Head of CX
- 2 → They feel the pain, they become your internal champion
- 3 → Message: "We help BPOs reduce manual agent workload by 70%"
- 4
- 5 Step 2: Get introduced to CDO / COO through the champion
- 6 → They unlock the budget
- 7 → Message: "Your team showed us the operational gaps – here's the ROI"
- 8
- 9 Step 3: Loop in CTO / IT early to avoid last-minute veto
- 10 → Message: "Our API integrates with your existing CRM/contact center stack"
- 11
- 12 Step 4: CEO / final sign-off
- 13 → Only for deals >\$50k or enterprise-level contracts

Linkedin Contacts

	Name	Title	Company	Priority	Why target
1	Andri Wibawanto	Director at PT Infomedia Nusantara, previously at Telkomsel	PT Infomedia Nusantara	High	Director-level = budget owner, Telkom background = understands enterprise scale
2	Zaki Wahab	VP of IT at PT Infomedia Nusantara — IT architecture, ISO 9001 contact center implementation	PT Infomedia Nusantara	High	Technical gatekeeper + IT decision maker — must be looped in
3	Deddy Hermansyah	Chief Sales and Marketing Officer at PT VADS Indonesia	PT VADS Indonesia	High	C-suite, leads sales & marketing — cares about competitive edge via AI
4	Anwar Solehudin	Senior leader at PT VADS Indonesia — ranked #2 Best Sales Manager APAC 2020	PT VADS Indonesia	Medium	Sales leadership — open to AI tools that improve team performance
5	Seisuke Kobayashi	CEO President Director at Transcosmos Indonesia — experience in CX, DX, digital marketing	Transcosmos Indonesia	High	Top decision maker, explicitly experienced in CX & digital transformation
6	Ardi Sudarto	Vice President Director at Transcosmos Indonesia	Transcosmos Indonesia	High	VP Director = second in command, operational decisions
7	Ronny Saputra	Head of WFM (Workforce Management) at Transcosmos Indonesia — 500+ LinkedIn connections	Transcosmos Indonesia	Medium	WFM = feels the pain of manual scheduling & staffing directly
8	Wahyu Wibisono	Managing Director & Chief Operating Officer at MitraComm Ekasarana	MitraComm Ekasarana	High	MD + COO = ultimate decision maker for operations + budget
9	Bambang Suryadi	Sr. VP Operations at MitraComm Ekasarana — 15+ years contact center, managed telco, insurance, banking, property, healthcare, automotive	MitraComm Ekasarana	High	Sr. VP Ops = the champion who feels the daily pain most
10	Mustafiq	Head of Contact Center Operations at MitraComm — previously VADS, Transcosmos, Teleperformance	MitraComm Ekasarana	Medium	Cross-company experience = knows competitor landscape, open to innovation
11	Endang Widya P	Direktur MitraComm Business Process Service — represented company at Kemnaker Job Fair 2025	MitraComm Ekasarana	High	Director of BPS unit = directly owns the BPO service line

BPO Company Contacts — 20 Companies

	Company	Email	Phone	WhatsApp	Website	Address
1	PT Infomedia Nusantara	—	—	—	infomedia.co.id	Jl. Rs Fatmawa 12150
2	PT VADS Indonesia	marketing@vads.co.id	62217991445	6285157764367	vads.co.id	Nariba Office T Prapatan Raya Selatan 12790
3	MitraComm Ekasarana	info.mecs@mitracomm.com	+6221 2555 6168	6285179598897	mitracomm.com	The East Tower Kuningan, Jakarta

13	VALDO Inc.	—	—	—	—	Jakarta
14	CustomerAXL	—	—	—	—	Jakarta — foun BPO
15	PT Tilyanpristka	—	—	—	—	Jakarta — BPO focused
16	BSR Indonesia	—	—	—	—	Jakarta — HR + BPO
17	PT Outsource Indonesia	—	—	—	—	Jakarta — labo
18	ATI Business Group	—	—	—	—	Jakarta — trav
19	PT Telin (Telkom International)	—	—	—	telin.co.id	Jakarta — state BPO
20	W Group	—	—	—	—	Jakarta — inte management

Cost Breakdown

Tool	Cost	Justification
Claude API	\$50-80	50K tokens/day for scoring + messages
Apollo.io	\$99	10K contacts/month, email sequences
Waalaxy	\$53	Unlimited LinkedIn automation, cloud-based
Supabase	\$0	Free tier sufficient for lead storage
Server/VPS	\$15	2GB RAM, runs daily cron job
Total	\$217-247	Generates \$90K pipeline = 360x ROI

Some Other choices

Layer	Paid Stack (\$217/mo)	ZERO COST (\$0/mo)	Trade-off
Data	Apollo.io (\$99)	LinkedIn Sales Navigator (trial) + Google Search API (free tier) + Manual desk research	Slower, more manual
AI Brain	Claude API (\$50-80)	Local LLM (Ollama/Llama 3) + Hugging Face (free inference)	Less smart, needs tuning
Database	Supabase (\$0, but paid for scale)	SQLite local / Google Sheets API (free)	No real-time sync
LinkedIn	Waalaxy (\$53)	LinkedIn API (official, free tier) + Python scripts	Riskier, needs care
Email	Apollo sequences (\$99 bundled)	Gmail API (free) + Python SMTP	Manual warmup needed
CRM	HubSpot (\$0 starter)	HubSpot stays FREE (under 1M contacts)	No change
Notifications	Slack (free)	Slack stays FREE	No change

Component	Solution	Cost	Why
Data	Apollo.io (1 month trial) then manual --> changed to use fully first party and scrapping	\$0-99	Trial gives 2,500 leads to start
AI Brain	Gemini API (free tier)	\$0	60 req/min = more than enough
LinkedIn	Manual + Content marketing	\$0	Post daily, engage manually
Email	Gmail API (free)	\$0	Warm up gradually
CRM	HubSpot (free)	\$0	Already using
Database	SQLite local	\$0	Simple, portable
